QA/Testing Engineer (m/f/x)
Permanent employee · Full-time · Headquarter Munich

ABOUT US

Carly's technology is changing the automotive world. With our products we offer car owners the world's best solutions to gain more control and transparency over their cars. Join our passionate team in Munich to make cars around the globe more connected!

What is Carly?

Carly is a cartech company that connects car fans with the information hidden inside their cars. We provide simple solutions throughout the lifecycle of car ownership, focusing on car health and maintenance, car purchase and customization, while delivering peace of mind and empowering you to save time and money.

What is Carly's purpose?

To be the reliable solution for car fans globally, delivering control with powerful data and valuable insights.

What is Carly's vision?

We want to be the daily companion for all car fans worldwide for whom their car is more than just a mode of transportation. We combine deep car technology with consumer- and design-focused solutions to create the first international digital automotive brand, without even selling a single car.

Long-term we are going to give back control, democratize car ownership and bring transparency to an industry that has forgotten the consumer.

Be part of our driven team and conquer the automotive world with us!

Your mission is to test, control and monitor every phase of the mobile app development process to ensure that the design and software adhere to company standards and customer needs.

RESPONSIBILITIES

- Enhance our application development by introducing a lean testing plan that catches errors before shipping the product;
- Spearhead a CI/CD pipeline that includes beta and production rollouts for our main application;
- Drive the test automation initiatives with developers by taking a collaborative approach, sharing your knowledge and expertise, building awareness and common understanding of quality;
- Ensure high quality app releases by defining, setting up and following through with pre-release test procedures;

REQUIREMENTS

- 5+ years of experience with a variety of different testing techniques such as UI Testing, Automated Testing, Test Driven Development Strategies and other;
- Proficient in Test Design and Execution (Unit-, Integration-, Regression-, Black/White-Box- and Smoke-Testing);
- Experience with building and maintaining CI/CD pipelines for mobile applications (iOS or Android);
- Experience with scripting languages (Python or Ruby);
- Ability to work in an agile environment and willingness to help your teammates, share your knowledge with them, and learn from them;
- Experience in writing clear, concise, and comprehensive test plans and test cases;

WHAT'S IN IT FOR YOU

- ✓ High impact and responsibility in a highly successful and fast-growing company on an international scale;
- ✓ A highly talented, dynamic, extremely motivated team;
- ✓ Strong management team with proven track records in successful startups to learn from;

- ✓ A high learning curve with all the possibilities for personal growth and professional development;
- ✓ No walls, no limits, no bureaucracy just unlimited potential;
- ✓ A competitive compensation;
- ✓ The nicest and most international team in Munich;

Sounds intriguing to you? Find out if you are the right person to take on this challenge!
