

Web Engineer (Full Stack) (m/f/x)

Permanent employee, Full-time · Headquarter Munich

ABOUT US

Carly's technology is changing the automotive world. With our products we offer car owners the world's best solutions to gain more control and transparency over their cars. Join our passionate team in Munich to make cars around the globe more connected!

What is Carly?

Carly is a cartech company that connects car fans with the information hidden inside their cars. We provide simple solutions throughout the lifecycle of car ownership, focusing on car health and maintenance, car purchase and customization, while delivering peace of mind and empowering you to save time and money.

What is Carly's purpose?

To be the reliable solution for car fans globally, delivering control with powerful data and valuable insights.

What is Carly's vision?

We want to be the daily companion for all car fans worldwide for whom their car is more than just a mode of transportation. We combine deep car technology with consumer- and design-focused solutions to create the first international digital automotive brand, without even selling a single car.

Long-term we are going to give back control, democratize car ownership and bring transparency to an industry that has forgotten the consumer.

Be part of our driven team and conquer the automotive world with us!

Your mission is to enhance Carly's web presence in both usability for customers as well as technical setup. You are fully involved in the improvements of our biggest acquisition and onboarding channel, reaching a global fast-growing automotive market.

RESPONSIBILITIES

- Develop meaningful product increments through user stories and thereby further engage our customer base;
- Take on responsibility during development by focusing on a high degree of stability and quality at all times;
- Ability to communicate and collaborate effectively with other engineers in developing solutions and aligning with your lead during sprints for expanding web content and improving its reach;
- Work in an agile environment to develop the next-generation web-tools that will ensure the effective exploitation in a local testing environment and implementing them;
- Ensure Carly's web presence remains at the cutting edge by increasing responsiveness and improving cross-platform optimizations;
- Work directly with high performance, industry-level, experts who drive technical expertise within the company;
- Keep up to date with emerging technologies and industry trends and apply them into development cycles;

REQUIREMENTS

- 3+ years of proven experience in full stack development;
- Proficient in web technologies such as html, CSS, Java Script;
- Experience with Vue.js, Hugo, Nuxt.js (Docker, Node.js Python - are nice to have);
- Able to work with API requests;
- Writing unit and integration tests;
- Experience working in an agile environment (Scrum or Kanban);
- Flexible, hands-on team player that takes on new challenges in a fast-paced environment;
- Attention to detail and diligent approach for development;
- Fluent in English;

WHAT'S IN IT FOR YOU

- ✓ High impact and responsibility in a very successful and fast-growing company and brand;
- ✓ A highly talented, dynamic, extremely motivated team;
- ✓ Strong management team with proven track record in successful startups to learn from;
- ✓ A competitive compensation;
- ✓ Work with AWS, Hugo, Docker, Continuous Deployment via Pipeline, Python, nodeJS, Gitlab, Jira.
- ✓ A high learning curve with all the possibilities for personal growth and professional development;
- ✓ No walls, no limits, no bureaucracy just unlimited potential;
- ✓ The nicest and most international team in Munich;

Sounds intriguing to you? Find out if you are the right person to take on this challenge!
